CEO - BUI VAN LIEM

VIET MINH LONG
HIGH QUALITY DOORS FOR TECHNICIAN

Dear Customers !

Viet Minh Long Mechanical Construction Trading Production Company Limited extends our warmest wishes for prosperity and our most respectful greetings !

Viet Minh Long is a pioneering and prestigious enterprise in the fields of consulting, design, production, and installation of modern, smart and durable aluminum door solutions. With more than 10 years of experience, Viet Minh Long has been providing customers and partners with high-quality products and services at competitive prices and with effective applications. Our products exclusively use the world's leading aluminum brands such as **Aluprof, Romadio, Maxpro.JP, and Ponzio**, with clear origins and quality standards that meet European benchmarks. Viet Minh Long is stringent in every process from manufacturing to construction and installation, ensuring that the final products meet the high standards of these esteemed aluminum companies.

"VIET MINH LONG ALUMINUM DOORS - ALUMINUM DOORS FOR FASTIFIED PEOPLE"

1. Absolute accuracy up to 99%

- Viet Minh Long has invested in a factory with a scale of up to 2000 m², equipped with modern CNC equipment and machinery that meet European standards. This ensures aesthetic aluminum cuts and corners with an accuracy of up to 99%.
- To ensure the most accurate size of the waiting box, Viet Minh Long conducts at least two size surveys: one before production and one before installation.
- 100% of contracts and detailed drawings are designed with precise visual style, size, material, and color specifications, allowing customers to make informed decisions before signing the contract.

2. Strict working process

- Departments coordinate to work according to strict process: Check product quality from input to output.
- Technical department: This is an important department providing construction and production plans for the project, with strict quality control standards, continuously reviewing and checking at each stage.
- Quality supervision: Pre-import inspection, production inspection, packaging inspection, installation inspection and pre-delivery inspection.

3. Accessories and materials - Must be genuine & synchronized

- Viet Minh Long uses high-end aluminum systems on the market with clear certifications and origins of the products.
- Viet Minh Long is certified as a reputable processing unit by representatives: **Aluprof, Maxpro.JP, Ponzio, Romadio,...**
- Viet Minh Long commits to using only genuine and high-end accessory systems.

Viet Minh Long commits

- Our products and services always meet the highest quality standards in the aluminum door industry.
 - Always put the interests of customers first and provide customers with the best value.
 - Focus on safety criteria and environmental protection in the production and supply of products.
 - Once again, we would like to sincerely thank our customers for their trust and interest in Viet Minh Long's products and services. We look forward to long-term cooperation and bringing success to our customers.
- Best regards !

SOLUTION
ALUPROF

**GREEN PRODUCTS, IMPORTED
SYNC FROM EUROPE**

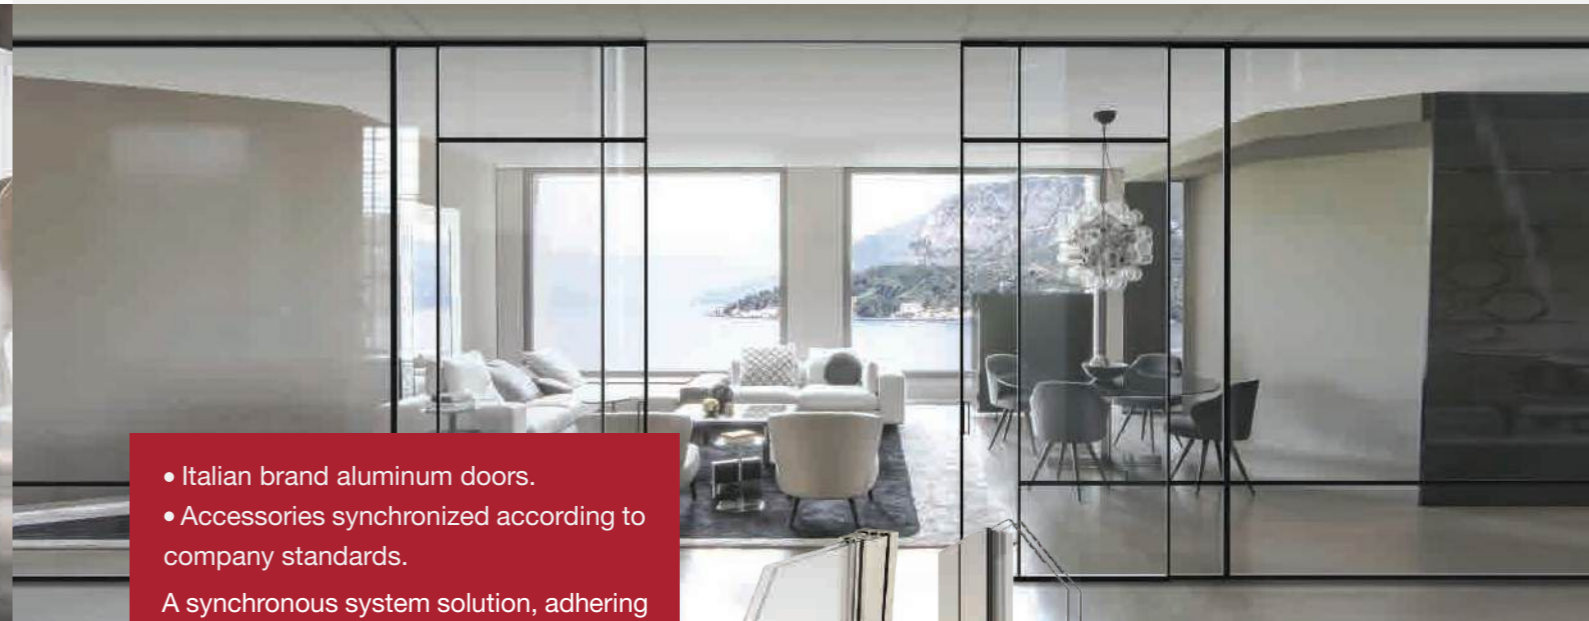

ALUPROF aluminum door systems are imported directly from Europe, boasting advanced production technology that guarantees prestige and quality. Provided by Aluprof SA, a company within the Grupa Kęty SA Capital Group, with over 70 years of experience in manufacturing and exporting aluminum and glass systems. Proudly the leading unit in Europe, ALUPROF operates five large-scale manufacturing facilities that meet international standards.

- Manufactured using cutting-edge European technology and stringent processes, ensuring products meet the highest standards: Durable - Safe - Aesthetic.
- The use of electrostatic spraying technology according to European Qualicoat standards provides durable exterior protection with color fastness for up to 10 years.
- The door body is crafted from aluminum alloy meeting standard 6066 - T6, known for its superior hardness and sturdiness, offering optimal force and impact resistance.
- The EPDM gasket system, used in high-end aluminum systems, enhances sound insulation and ensures high tightness to prevent rainwater ingress.
- The thermal insulation bridge, made from Polyamide plastic strip produced by the Technoform Group of Germany, boasts excellent mechanical durability. It is highly resilient, hard, and has good load-bearing capacity. Additionally, it features poor electrical and thermal conductivity with a melting temperature of 220 degrees Celsius.

**SYNONYMOUS SYSTEMS SOLUTIONS,
CLASS, EUROPEAN STANDARDS**

SOLUTION
ROMADIO

- Italian brand aluminum doors.
- Accessories synchronized according to company standards.

A synchronous system solution, adhering to European standards, is thoroughly researched, assembled, and tested before market release. This includes aluminum, accessories, and auxiliary materials, creating a flawless system with maximum soundproofing and thermal insulation performance, ensuring absolute safety for users.

OPTIMAL SLIM DOOR SOLUTION FOR PROJECTS

Combined with European-standard synchronous accessories, such as power wheels, the door operates smoothly, especially for large, slim door sets with high technical requirements.

- Exclusive surface treatment technology, CPC - Matte Electrodeposition, provides a smooth surface, corrosion resistance, sea salt resistance, and color fastness for up to 25 years.
- High aesthetics, offering many trendy designs and colors.
- Exclusive double-wheel system for sliding doors, ensuring sturdiness without shaking the wing tips. With a weight capacity of 300kg, both children and women can operate it gently and safely.
- New generation sliding door system hides all installation screws, providing a clean and clear experience.
- Panorama sliding door with visible wings of only 19mm (the thinnest on the market) offers the clearest view with a standard glass/door ratio of 99.3%.
- Handle designs from Italy, the capital of architectural art and fashion, always at the forefront, delivering the most premium feel.
- Fast ordering time compared to imported products, yet maintaining consistent European standards.

JAPANESE ALUMINUM DOORS
MAXPRO.JP

PROCESSING TECHNOLOGY
TOP SURFACE

- ▶ Aluminum doors, manufactured using advanced Japanese technology, adhere to modern standards set by experts from Japan and meet European standards.
- ▶ The surface is treated with Japanese Anodized technology.
- ▶ Accessories are either synchronized or customized based on the investor's request.

HIGHLIGHTS OF MAXPRO

- ▶ One of the most popular products in Vietnam in 2022, 2023 and are still leading the trend on the market today.
- ▶ Diverse solutions from doors, facades, railings.
- ▶ Products are researched and developed based on environmental characteristics, climate, style modern, so suitable for most architecture projects in Vietnam.
